TERMS & CONDITIONS

08677 300 400

[www.osszim.com](http://www.osszim.com)

534 Pomona Business Park, Harare Drive

All orders are subject to stock availability. Please be advised that prices are quoted in United States Dollars, typically payable in ZWL RTGS at the market rate of the day. Price estimates are provided for convenience purposes and are subject to change without notice.

An example of what can typically be powered by each of our commonly selected systems is indicated on our website ([www.osszim.com/typical-systems](http://www.osszim.com/typical-systems)). Proper system management is strongly recommended to avoid disappointment caused by misuse of the system design specification. By managing the system well, the lifespan of the equipment is extended and the system's ability to charge the batteries is at maximum efficiency. Please note that generator back up is recommended to maintain the batteries when a high load is required, or consecutive days of overcast weather are experienced. Each system design has a pricing guideline, that does not include installation.

Please note that One Stop Solar is primarily a registered and accredited warranty & distribution centre. We do not typically offer installation as a part of our domestic solutions but try to support the local installation sector instead. All contact details for installers are distributed as a convenient service for our customers. These installers are not One Stop Solar employees, and DO NOT represent One Stop Solar. One Stop Solar recognize the installers on our recommended list as being suitably competent and accredited.

Warranties on equipment are carried by our equipment manufacturers and not by One Stop Solar. The activation of a warranty is contingent upon the proviso that installation and commissioning are done by a One Stop Solar accredited installer, and all warranty registration procedures have been observed. Please be advised that all our manufacturers require supporting documentation for all warranty claims. The onus lies with the customer to provide this documentation, and not with One Stop Solar.

Please note whilst every effort is made to ensure our service and information meets the highest standard, our staff are constantly being trained and upskilled. One Stop Solar reserve the right to amend any quotation that has been given by an employee, should the quote be found to be incorrect, or requiring amendment.
